## Herbert Integrated Farm Management Project (HIP)

This project aims to improve farm productivity, profitability and water quality outcomes for Herbert sugarcane producers through whole-of-farm management support. Advisors and technical experts will collaborate with growers to identify and address constraints in the five key areas of farm management.

Crop nutrition

Soil health

Farm biosecurity

Natural capital

Farm business

Icons by Bricklay, Noun Project

Opportunity to receive one or more of the following:

- One-on-one expert agronomic and GIS support
- Tailored whole-of-farm Nutrient Management Plan (NMP)
- Tailored Soil Amendment Plan
- Tailored Weed Management Plan
- Strategic soil and crop mapping to identify productivity constraints (eg. NDVI, drone and EM mapping)
- Soil samples to address soil constraints (up to 6 free tests – grower pays for 1<sup>st</sup> sample, project covers subsequent samples from the same block)
- Pest and disease diagnostic assessments (incl. up to 6 free *Pachymetra* tests and up to 20 free Ratoon Stunting Disease tests)
- Water source assessments to improve spray efficacy (up to 4 free tests)
- Invitation to attend project workshops and grower group activities

What will it involve?

- Provide historical soil test and farm management records
- Engage with grower group activities
- Complete management practices (Paddock to Reef) survey
- Consent to provide spatial and yield information for your farm
